

Rypple is delighted to provide Australian schools with quality, free online professional learning to support student engagement utilising the Positive Behaviour for Learning (PBL) framework.

The The Interconnected Systems Framework (ISF) integrates PBL and School Mental Health, and creates a more streamlined approach to school mental health and wellness by connecting all mental health efforts through one system.

The Interconnected Systems Framework

- Mental health is recognised as a critical part of education; however, schools still struggle with how to develop a comprehensive system of mental health support.
- The ISF is being implemented in more than 30 states around the U.S.A and being explored in other countries (Iceland, the Netherlands, New Zealand).
- The ISF PL provides training on how to embed mental health supports within the PBL framework to create a comprehensive system of mental health supports in schools. These include school-based teams using data to select interventions and monitor student outcomes.

This PL is FREE for all Australian school staff!

Six sessions on the ISF will be delivered live via Zoom. Each of these sessions will be repeated in a morning, midday and afternoon session to make it easier for school staff to attend.

Resources from the live sessions will be freely available on the Rypple website.

This has been designed as an easy to use professional learning resource that schools can provide to their whole staff, at times that best suit them.

Book in for the sessions at: <https://rypple.org.au/isf-registration-links/>

Please note all times are in Australian Western Standard time, and adjust for your timezone and daylight saving

Session #	ISF SESSION CONTENT	Date	Morning	Midday	Afternoon
1	Tier 1: Systems and Data to Support All Students	Tuesday 7th February	6:00am	10:30am	3:30pm
